Summary

Software Engineer specializing in full-stack enterprise applications, delivering scalable solutions using Java, Angular, and cloud-native architectures. Passionate about building reliable, high-performance systems through cloud migration, clean architecture, and end-to-end ownership in Agile environments.

Experience

Citizens Financial Group | Neoit EK Systems (Contract)

January 2023 – Present

Software Development Engineer

Dallas, Texas

- Engineered a credit card origination platform using **Java Spring Boot microservices** within an **Agile/Scrum** environment, reducing processing time by **75%** and enabling seamless customer onboarding.
- Built reusable **Angular web components** using **TypeScript, HTML5, and CSS3** with a **micro frontend architecture**, improving UI modularity and reducing frontend build times by **30%**.
- Delivered secure full-stack customer-facing applications with **Angular, Node.js, and Okta OAuth2**, enforcing **secure coding standards** and boosting user engagement by **40%**.
- Integrated **Accertify, Experian, ThreatMetrix, and TSYS RESTful APIs** to automate credit, fraud, and issuance workflows—streamlining operations and improving approval accuracy by **20%**.
- Designed a **fraud detection dashboard** using **Angular, TypeScript, and Spring Boot**, implementing responsive UI components and backend data pipelines that reduced fraudulent applications by **25%**.
- Migrated legacy systems to **AWS (Lambda, S3, RDS)**, containerized services using **Docker and Kubernetes**, reducing hosting costs by **85%** and improving scalability and uptime.
- Automated compliance workflows using **SEFAS** and established **CI/CD pipelines via Jenkins**, ensuring **100% regulatory compliance** and accelerating deployment cycles.
- Enhanced **CardUpgrade reapplications and pricing workflows** across full-stack **Spring Boot and Angular** modules, improving conversion rates by **15%** and reducing processing errors by **20%**.

University of Texas at Arlington

December 2021 – December 2022

Software Engineer

Arlington, Texas

- Developed full-stack modules for the **CEMS Portal** using **Java, Angular, TypeScript, and SQL**, enabling course management for **10,000+ students** and driving a **30%** enrollment increase.
- Built responsive **HTML5/CSS3 and Angular** UI components for student-facing workflows, reducing support tickets by **20%**.
- Optimized **50+ SQL stored procedures and tables** in **SSMS**, improving data retrieval speed by **40%** and reducing system downtime by **25%**.
- Mentored junior developers through **SQL Server training sessions**, significantly improving team SQL proficiency and accelerating onboarding for new engineers.

Morgan Stanley

August 2020 – August 2021

Software Engineer

Bangalore, India

- Maintained **99.9% uptime** for **Risk1 trading applications** supporting global front-office teams, resolving critical production incidents with zero business-hour downtime breaches.
- Reduced repeat incidents by **30%** by leading root cause analysis and implementing permanent fixes across application and infrastructure layers in an **Agile/Scrum** environment.
- Built automated monitoring pipelines for **metrics, logs, and alerts**, improving defect detection efficiency by **40%** and enabling proactive resolution before business impact.

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, SQL

Frameworks: Spring Boot, Angular, React, Node.js, Microservices, Bootstrap

Cloud & DevOps: AWS (Lambda, S3, RDS, SQS, SNS), GCP, Azure, Docker, Kubernetes, Jenkins, CI/CD, Terraform

Databases & Messaging: MySQL, MongoDB, SQL Server (SSMS), Redis, Apache Kafka

Tools & Platforms: GitHub, Bitbucket, Postman, Jira, Okta, Linux

Education

The University of Texas at Arlington

Dec 2022

Master of Science in Computer Science

Arlington, Texas

Joginpally Institute of Engineering and Technology

May 2020

Bachelor of Science in Computer Science

Hyderabad, India
