Education

The University of Texas at Arlington

Master of Science in Computer Science

Dec 2022

Arlington, Texas

Joginpally Institute of Engineering and Technology

Bachelor of Science in Computer Science

May 2020

Hyderabad, India

Experience

Citizens Financial Group

Software Development Engineer

January 2023 – Present

Dallas, Texas

- Engineered a credit card origination platform using **Java Spring Boot microservices**, reducing processing time by **75%** and enabling seamless customer onboarding.
- Integrated **Accertify, Experian, ThreatMetrix, and TSYS APIs** to automate credit, fraud, and issuance workflows—streamlining operations and improving approval accuracy by **20%**.
- Delivered secure customer-facing applications with **Angular, Node.js, and Okta OAuth2**, enhancing compliance and boosting user engagement by **40%**.
- Migrated legacy systems to **AWS (Lambda, S3, RDS, Docker, Kubernetes)**, reducing hosting costs by **85%** and improving scalability and uptime.
- Designed a **fraud detection dashboard** using Angular and Spring Boot that reduced fraudulent applications by **25%** and increased customer retention by **30%**.
- Automated compliance workflows using **SEFAS**, ensuring **100% regulatory compliance** and eliminating manual delays.
- Enhanced **CardUpgrade reapplications and pricing workflows**, improving conversion rates and operational efficiency.

University of Texas at Arlington

Software Developer

December 2021 – December 2022

Arlington, Texas

- Developed core modules for the **CEMS Portal** using Java, Angular, and SQL, enabling registration and course management for over **10,000 students** and driving a **30% increase** in enrollments.
- Automated and generated **150+ monthly compliance reports** via SSMS, maintaining **98% safety compliance** across departments.
- Optimized **50+ SQL stored procedures and tables**, improving data retrieval speed by **40%** and reducing system downtime by **25%**.
- Led **SQL Server training sessions** for developers, improving team competency by **70%** as measured by post-training assessments.
- Co-developed a **student check-in/checkout application** serving **5,000+ daily users**, reducing operational errors by **50%** and increasing engagement by **35%**.

Morgan Stanley

Software Engineer

April 2020 – August 2021

Bangalore, India

- Led development of a **web-based risk management application** for the Risk1 team using Angular, Spring Boot improving production efficiency by **20%**.
- Architected a **real-time risk visualization platform** enabling instant access to trading exposure data for **50+ analysts**.
- Implemented **automation pipelines** that reduced issue resolution time by **30%** and repeat incidents by **40%**, enhancing system stability.
- Developed and automated **monitoring workflows** for performance metrics and logs; conducted root cause analysis and deployed permanent fixes for recurring issues.
- Designed and executed **performance test plans** that improved system throughput by **3%** and enhanced application reliability under high load.

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, SQL, C, PHP

Frameworks: Spring Boot, Angular, React, Node.js, Microservices, Bootstrap

Cloud & DevOps: AWS (Lambda, S3, RDS), Docker, Kubernetes, Jenkins, CI/CD

Databases: MySQL, MongoDB, SQL Server (SSMS)

Tools: GitHub, Bitbucket, VS Code, Eclipse, Linux
